

Saiful Islam Soaus

Full-Stack Developer | MERN Stack Developer

Dhaka, Bangladesh • GitHub: github.com/saiful-islam-soaus-45 • Portfolio: startupforge-client-navy.vercel.app

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate and passionate full-stack developer focused on building fast, scalable, responsive, and user-friendly web applications. Experienced with modern JavaScript technologies and MERN-stack development, with a strong interest in clean UI, practical problem solving, authentication, REST APIs, and database-driven applications.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React, Next.js, Tailwind CSS, DaisyUI
Backend	Node.js, Express.js, REST API development
Database	MongoDB
Authentication	Better Auth, JWT
Tools	Git, GitHub, VS Code, Vercel

SELECTED PROJECTS

StartupForge — Startup & Opportunity Platform

- A full-stack platform for founders and users to discover and manage startup opportunities. Includes authentication, startup/opportunity management, applications, subscriptions, transactions, and a dedicated admin section with controls over platform data and activities.

Technologies: Next.js, React, Tailwind CSS, Node.js, Express.js, MongoDB, Better Auth, JWT, Vercel

DriveFleet — Car Rental Platform

- A modern car-rental web application designed to make vehicle discovery and rental management simple, responsive, and user-friendly.

Technologies: React, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB

Book Borrowing Platform

- A responsive book borrowing platform with search and category-based browsing, designed to provide a simple experience for discovering and managing books.

Technologies: Next.js, React, Tailwind CSS, DaisyUI, Better Auth, MongoDB

EDUCATION

B.Sc. in Computer Science and Engineering — Dhaka International University

Focus areas: Web Development, Database Systems, Software Engineering, Computer Networks, Operating Systems, Theory of Computing, and Machine Learning.

ADDITIONAL STRENGTHS

- Responsive UI development
- REST API integration
- Authentication & authorization
- Problem solving
- Clean and reusable code
- Continuous project-based development
